- ✓ Build students' skills necessary for lifelong career success
- ✓ Scale your career support and boost student employability
- ✓ Help students communicate and evidence their skill claims
- ✓ Encourage lifelong learning and skill development
- ✓ Provide post-graduate support with lifelong access

## About CareerPrepped

CareerPrepped is a lifelong career success system that empowers students and alumni to continuously build, prove and showcase their skills to stand out in the competitive labor market.

## Core Features of CareerPrepped

### Skill Builders

40+ competency-based Skill Builders enable students to build employability skills necessary for lifelong career success through a continuous process of learning, reflection and practice.

### Skill Badges

Students claim open badges that represent their “employability skill” claims learning how to articulate and evidence the skills employers say are hard to find and screen for, yet are growing in demand.

### Career Portfolio

Every student gets unlimited storage to upload multimedia files to prove any skill they claim to have. They can link files to their Skill Badges or skills they indicate in their career site. Portfolio files could represent projects, awards, work samples, credentials, etc.

### Career Site

The Career Site gives students a professional web presence. Students can link their Skill Badges and portfolio files to their listed skills allowing visitors to see evidence of their skill claims.

### Career Toolbox

The Career Toolbox gives students access to a Targeted Resume Builder to build custom resumes from their Career Site, Interview Prep Videos to enhance interview skills, and free curated career tools to use on-demand.

### Job Center

The Job Center connects students with relevant opportunities. It allows students to search and save jobs, track their progress from application to offer, and save notes on each job.
